Date

Tuesday, September 14

In a medical setting, play and expressive therapies can be used to help children understand and process their illness and can even have a tangible effect on their physical symptoms and overall wellness. This webinar will explore best practices for authentically engaging with families in public services delivery to inform state and local programs, practices, and policy development. They will discuss insights from their community’s system of care.

Study: How Has the Pandemic Affected Students with Disabilities?

– from U.S. News & World Report

Details

Researchers reviewed studies and convened panels to gauge the pandemic's effects on students' academic progress, mental health, and social-emotional well-being. Two-thirds of teachers viewed the pandemic as having a negative impact on students with disabilities. The researchers say there is a need for more training and support for teachers to help them address the needs of students with disabilities.
